

Mauro Bologna, medico chirurgo,
Professore ordinario di Patologia Generale, Università degli Studi dell'Aquila.
CV sintetico – L'Aquila luglio 2019.

Docente di Patologia Generale, Fisiopatologia, Immunologia, Patologia Ambientale nei Corsi di Laurea in Medicina e Chirurgia ed in Biologia della Salute e della Nutrizione.

Dipartimento di Medicina Clinica, Sanità Pubblica, Scienze della Vita e dell'Ambiente

Iscritto all'Albo dei Medici della Provincia dell'Aquila.

Presidente SIPNEI. www.sipnei.it

Nato a Napoli il 12 gennaio 1952.

Maturità Classica, Liceo "Torquato Tasso", Roma, 1970.

Laureato in Medicina e Chirurgia, con lode, Libero Istituto Universitario di Medicina e Chirurgia, L'Aquila 1976.

1978-1985, a più riprese: Post-Doc and Visiting Scientist, Dulbecco Laboratory, The Salk Institute for Biological Studies, La Jolla, California, USA.

Autore di oltre 300 pubblicazioni scientifiche su temi di ricerca in immunologia, oncologia, malattie infettive e fisiopatologia e di volumi monografici come "Il cancro si può evitare" (Verduci Editore, Roma, 1988), "Guida per una dieta anti-malattie" (Franco Angeli Editore, Milano, 1994); "Pandemie: Virologia, patologia e prevenzione dell'influenza" (Bollati Boringhieri, Torino, 2010); "Biotargets of cancer in current clinical practice" (Springer-Humana Press, New York, 2012) ed altri.

Direzione e coordinamento del Master Universitario in Psico-Neuro-Endocrino-Immunologia e Scienza della cura Integrata, presso l'Università degli Studi dell'Aquila, a partire dal 2014, in convenzione con SIPNEI.

"Referee" scientifico ("Peer Reviewer") per varie riviste internazionali, tra cui JAMA (Journal of the American Medical Association), Cancer Research, International Journal of Cancer.

Dal 1997 ha tenuto annualmente (ininterrottamente fino ad oggi) il corso di PATOLOGIA AMBIENTALE (riguardante temi di portata planetaria -venuti finalmente alla grande attenzione del pubblico con i movimenti giovanili attuali ispirati dallo "Skolstreik for Klimatet" di Greta Thunberg- ; tutto questo ha riflessi estesi sulla salute umana e presenta risvolti economici, sociali, ecologici e medici davvero importanti). Il suddetto corso si rivolge espressamente agli studenti dei corsi di Laurea in Scienze Biologiche, in Scienze Ambientali ed in Medicina e Chirurgia, per ampliare le loro basi di conoscenza in ambito di prevenzione primaria della malattie e di salute degli ecosistemi ambientali fortemente antropizzati. Vedi sito internet <www.isavemyplanet.org>.

PUBBLICAZIONI - Sono qui di seguito elencate in ordine cronologico alcune delle pubblicazioni più rilevanti di Mauro Bologna (1979-2019), sulle oltre trecentoventi complessive.

Dulbecco, R., M. Bologna, and M. Unger. "Differentiation of a Rat Mammary Cell Line in Vitro." Proceedings of the National Academy of Sciences (1979): 76, 1256-1260.

Dulbecco, R., M. Bologna, and M. Unger. "Role of Thy-1 Antigen in the in Vitro Differentiation of a Rat Mammary Cell Line." Proceedings of the National Academy of Sciences 76 (1979): 1848-1852.

Dulbecco, R., M. Bologna, and M. Unger. "Control of Differentiation of a Mammary Cell Line by Lipids." Proceedings of the National Academy of Sciences 77 (1980): 1551-1555.

Bologna, M. "Cancro Mammario - Ricerche a Livello Cellulare." Rendiconti della Accademia Nazionale dei Lincei, Classe di Scienze Matematiche, Fisiche e Naturali, serie VIII 70, Primo Semestre 1981, fasc. 6 (1981): 289-296.

Dulbecco, R., M. Unger, M. Bologna, H. Battifora, P. Syka, and S. Okada. "Crossreactivity between Thy-1 and a Component of Intermediate-Size Filaments Demonstrated by a Monoclonal Antibody." Nature 292 (1981): 772-774.
